

## FM.1 Extra Practice

- Estimate, then calculate the unit price of each product.
  - \$5.99 for 8 hamburgers
  - \$11.96 for 4 containers of windshield washer fluid
  - \$1.74 for 4 green peppers
  - \$4.77 for 6 rolls of paper towels
- The unit price of brown sugar in bulk is \$1.90 per kilogram. What is the cost of each amount?
  - 5 kg
  - 20 kg
  - 42 kg
  - 0.5 kg
- Given the unit price of each item at a bulk food store, estimate, then calculate the cost of each amount.
 

Product	Unit Price	Amount
a) Raisins	\$0.55/100 g	500 g
b) Pistachios	\$2.05/100 g	125 g
c) Egg noodles	\$0.43/100 g	275 g
d) Tea	\$0.13/10 bags	75 bags
- A case of 24 juice packs costs \$11.97. An 8-pack of juice costs \$4.47. Which size would be the most economical if you needed to buy 100 drinks for a school breakfast program? Explain your thinking.
- Determine the unit price for each item.
  - \$7.00 for 400 g of almonds
  - 227 g of mushrooms for \$2.99
  - \$1.49 for 3.2 kg of tangerines
  - 1.5 kg of pork ribs for \$6.68
- What is the original unit price and the new unit price of each item?
  - 25 kg of potatoes are reduced from \$4.99 to \$2.99
  - a pack of 8 batteries goes up from \$3.49 to \$3.99
  - 750 mL of soda for \$1.79 goes on sale for \$0.79
- What is the percent increase or decrease in price for each item in #6? Round your answers to the nearest percent.
- Determine the unit price using either 1 mL or 1 L. Explain your choice.
  - \$8.96 for 950 mL of conditioner
  - 50 mL of moisturizer for \$16.99
  - 3.7 L of paint for \$25.99
